What's New with CHIRP Version 3.0?

CHIRP
Children and
Hoosiers
Immunization
Registry
Program

- CHIRP has an enhanced the left navigation menu to allow main menu categories to be collapsed and expanded to display sub-menus *(see the Menu Training video in the Version 3.0 Resource Center)*.

- There is a new feature that will display the reason why a vaccine dose does not meet the ACIP guidelines and is marked as invalid with a red 'X' on the Vaccination View/Add grid. The "invalid dose" reason is displayed on the Vaccination Detail screen for that particular dose.

- Added an option for users to create a user-defined favorites list that appears as the first item on the left navigation menu *(see the Menu Training video in the Version 3.0 Resource Center)*.

What's New with CHIRP Version 3.0?

- CHIRP will now show contraindications and deferrals on the vaccination summary screen.

- CHIRP will prevent a shortened version of a patient's name from overwriting a longer version. For example, "JENN" or "JENNIFE" would not overwrite "JENNIFER".

- The lot number summary report now has a column for the Starting Number of Doses

- CHIRP will now show a warning if you try to leave the Vaccination Add Detail screen without saving.

- Contraindications:
  - Changed "Parent report of disease" to "Parent/patient report of disease".
  - Added "Laboratory Evidence of Suppression" for Hepatitis A.
  - Added "Medical Contraindication-Immuno Suppression" for Yellow Fever.

- CASA Export and Reminder Recall menu links were moved below Settings on the navigation menu.

- When a physician is added to CHIRP, a message now confirms that the addition was successful.

- CHIRP will prevent an unnamed baby from overwriting Demographic information so new patients whose first name indicates the baby has not been named yet, for example 'NEWBORN', 'BABY BOY', 'BABY GIRL', will not overwrite existing demographic information during de-duplication.

- CHIRP has an option now under Personal Settings to allow you to control the order of the lot list. The options are: Facility Group then Facility, Facility, Expiration Date, Manufacturer, and Lot Number.

- CHIRP will now prohibit the duplicate entry of a Physician/Vaccinator to the same IRMS and Facility.

- The VFC Vaccine Administered Report is now alphabetized by the vaccination description.

- The VIS Publication Dates on the Personal Settings page are now sorted alphabetically by the vaccination description.
